Web-based Learning Using Virtual Microscopy

Living up to Life

Web-based Learning Using Virtual Microscopy

Virtual Microscopy is here

eLearning has become the method of choice for modern educators; from professional testing right through to academic learning, web-enabled delivery of learning material has become more commonplace than ever before. The Leica educational software suite from SlidePath allows the teachers of today – and tomorrow – to enjoy all the benefits virtual microscopy has to offer.

Digital SlideBox

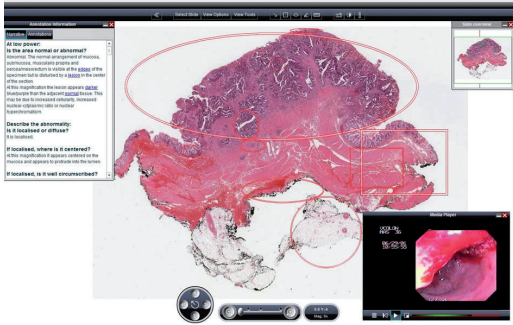

Your complete learning management system for Virtual Microscopy. Digital SlideBox is equipped with all the tools you need to author, deliver and review learning material within a user friendly online environment.

Digital Image Hub

Integrate Virtual Microscopy into your online learning portal using Digital Image Hub. Create customizable links to individual images and collections to seamlessly blend virtual microscopy into your existing online resources.

Create interactive courses using pathology, clinical photographs, gross morphology, radiology and more

Seamlessly integrate digital slides, case notes, annotations and multimedia

Your Benefits:

- Readily accessible 24 hours a day, 7 days a week from any web-enabled computer
- Share your slides more easily using our intuitive web-based viewer
- Promote independent learning using customized quizzes and MCQs
- Real-time feedback allows learners to assess their own performance
- Incorporate annotations, discussions and multimedia to emulate patient workflows
- Create new or enhance existing resources with the power of Virtual Microscopy
- Use formal teaching time more effectively

SlidePath applications are not cleared by the FDA, Health Canada or in the EU for diagnostic or clinical use. All applications are intended solely for use in the research or educational setting, such as university or pharmaceutical development. These applications are described as Research Applications or Research Use Only.
