

## Step Beyond Infinity

**With the Leica M165 FC and M205 FA, fluorescence stereomicroscopy moves into a new dimension.**

- FusionOptics™: Highest resolution power and outstanding depth of field
- Largest zoom range in stereomicroscopy : from overview to detail with just a single microscope
- Triple Beam™-principle for brilliant, high-contrast fluorescence images
- FluoCombi™: stereo and high-resolution macro view within one instrument
- From basic software integration up to multidimensional fluorescence imaging
